

Amendments to the Specification

The amendments of the Specification concern editorial changes only. Hence, no new subject matter has been added or deleted. The following paragraphs will replace the corresponding previously filed paragraphs:

Replace Paragraph [0006] with the following:

-- The object of the invention is to remedy these disadvantages. [[of the invention.]] --

Replace Paragraph [0029] with the following:

--Said bearing zone may be delimited by at least a proximal transverse wall that it has. According to a preferred embodiment of the invention, in this case, the accessory comprises two roughly parallel proximal transverse walls offset in the longitudinal direction and which between them delimit a housing for accommodating the proximal flange or proximal lateral tabs that the body of the syringe might have. --
